

Opportunity hub

Prathyusha Vishwanathan

Use these resources to find opportunities for work experience or work after you graduate. You may also find it useful to contact relevant people in your network and keep an eye on LinkedIn and social media for any, such as for job adverts. Don't be afraid to get in contact with opportunity providers like hospitals about how they specifically advertise opportunities and what they might have available.

Science Careers

Known to provide excellent job opportunities in Biomedicine, translational research, preclinical development and health sciences in countries such as the UK, US, Europe and Asia.

Student Circus

Provides handpicked jobs, placements and internships in all UK sectors. Some jobs and employers referred by student circus also provides a Tier 2 VISA, which may be useful for international students.

NHS Jobs

Main provider of Biomedical Scientist jobs and Medical Laboratory or Associate Practitioner jobs in Pathology departments in NHS hospitals.

The Biomedical Scientist Jobs

Official job board of the Institute of Biomedical Science and exceptionally certified platform providing opportunities for all biomedical science disciplines as well as veterinary science and research. Featured recruiters include Spire Healthcare, NHS, Pure Healthcare Group.

Graduate Recruitment Bureau

Excellent platform for placements, internships and graduate jobs in the UK providing opportunities with recruiters such as AstraZeneca and Ashfield Healthcare.

SES

A well-established platform and excellent guide for student internships or placements, if you want to gain work experience while studying. Also provides some graduate opportunities.

Unitemps

Recruitment service at Salford University House, providing employment services to job seekers across all profiles.
